

Storm Barriers - Rapid Deployment CART

HESCO.COM

HESCO.COM

CART™ is a new system for delivering HESCO® storm barriers.

CART provides a specially designed delivery system, allowing rapid, mechanized deployment of Hesco's renowned barrier products. By packaging units as a cartridge, using a patented system of additional components, towed CART versions of HESCO barriers dispense pre-joined standard or recoverable units, ready for filling. CART can be towed with any mechanical handling equipment or off-road class vehicle.

This unique innovation cuts deployment time to a tenth of that required when unpacking, erecting, aligning and joining traditionally palletized product. When combined with mechanized filling, CART provides a complete solution for emergency situations or when planned response to a threat is preferred to pre-existing temporary or permanent barriers.

Hesco has been providing protection in military and civil arenas for the past 22 years. HESCO Concertainer™ has become the system of choice for applications as varied as field fortifications and perimeter defenses, ammunition compounds and firing ranges, homeland security and infrastructure protection, land reinforcement and architectural projects, and emergency flood protection and flood prevention.

Now with the CART system, emergency response times are dramatically reduced.

For more information about Hesco's products and CART, contact us direct or visit our website at: www.hesco.com

The product featured in this publication comes with a 2 year warranty, subject to Hesco's terms and conditions.

Storm Barriers

Product	Height	Width	Length
<i>Rapid deployment</i>			
CART SL3942	39" (1.00m)	42" (1.06m)	288' (88m)
CART SL3942 R	39" (1.00m)	42" (1.06m)	288' (88m)

Accessories

Accessory	Description
